Together we help millions of people around the world to enjoy better lives. Our solutions enable dental treatments like same day crowns, and less invasive and less painful dental surgeries. If you are an engineer within software development, optics, mechanics or electronics we need your help to shape the future!

We are always looking for talented engineers who thrive in a fast paced, international environment characterized by high ambitions and a fun informal atmosphere. We work in autonomous agile teams employing state-of-the-art components, sensors and tools to create real time 3D solutions for diagnostics, treatment and manufacturing.

“We are still in the process of building the foundation. As a result, you have the opportunity to gain a lot of responsibility if you join us now. We build our cloud algorithms and pipeline from scratch. There are no off-the-shelf solutions for high performance 3D data processing”

Søren
System Architect, Software Development

Let us change the future of dentistry **together!**
