

Work at the heart of change

At the heart of every great change is a great human. If you have ideas, ingenuity and a passion for making a difference, come and be a part of our team.

Working as an engineer at Accenture you'll have the opportunity to work with exceptional people, the latest and greatest tech and leading companies across industries.

At Accenture, we work to harness meaningful, powerful change. We are proud of our culture and genuine collaboration in which everyone helps each other succeed. Thrive in a diverse and collaborative team where people at every level recognize

individuality, encourage development and inspire each other to reach greater achievements.

You will be given access to the newest development tools, and get personal and technical training through both our global training facilities and local courses. Furthermore, you will get your own career counselor whom you will interact with on regular basis, ensuring you follow a career path that suits your needs and ambitions.

Let there be change

About Accenture

Accenture is a global professional services company with leading capabilities in digital, cloud and security. Combining unmatched experience and specialized skills across more than 40 industries, we offer Strategy and Consulting, Interactive, Technology and Operations services—all powered by the world's largest network of Advanced Technology and Intelligent Operations centers. Our 506,000 people deliver on the promise of technology and human ingenuity every day, serving clients in more than 120 countries. We embrace the power of change to create value and shared success for our clients, people, shareholders, partners and communities. **Visit us at www.accenture.com**

accenture.dk/careers

As an engineer in a business analyst and manager role, I utilize my technical background to understand complex systems and to communicate with a lot of different technical stakeholders. When I was still a student, I did not at all connect my degree in biomedical engineering or personal desires with a career in consulting, but my advice is to just go for it and be open minded to whatever opportunities you might come across, even though it might be a bit off track with what you initially wanted!

- Lisa, MSc Medicine and Technology from DTU, Business & Integration Architecture Senior Analyst at Accenture Denmark
