

Ready to shape the future? Worldwide? At GEA?

Have you always wanted a job with tasks and responsibilities that have a direct impact on changing our everyday life for the better? Then here's your chance. GEA has a lot of opportunities to offer candidates driven by the desire to make a difference professionally.

We're continuously looking for motivated people who are eager to work in a company with focus on technology and innovation.

We value knowledge and expertise in the fields of automation, chemistry, food and mechanics. Newly graduated engineers possess high-value knowledge in these areas and, therefore, hold qualities of great relevance and importance to GEA.

Think you could be the right candidate? Then join us on our adventure.

Influence your own journey – A career in process technology?

GEA might be the place for your future development. We develop and maintain machines ranging from the size of a shoebox up to the size of an eight-storey building.

We continuously aspire to create optimal solutions. By focusing on providing our customers with state-of-the-art solutions, we're aiming to be market and technology leaders in our business areas.

As an employer

We believe in creating an attractive workplace with room for development and new ideas, and we can offer a working environment with international teams and a constructive and positive atmosphere.

As a newly educated candidate at GEA, you'll have lots of possibilities of influencing your career path and professional journey. Internal mobility is key and, whether you'd define yourself as a specialist or a generalist, you'll benefit from this at GEA. Moreover, we offer internal courses, which allow participants to develop international contacts and grow global networks.

Opportunities and challenges

As we offer new candidates exciting and challenging opportunities, we expect something in return –

because with great opportunity comes great responsibility.

If you're open for great opportunities and the responsibility that comes with them, we promise to provide you with a dedicated colleague or team for technical and practical support when you start.

Room for development

"My journey at GEA started through its Project Management - International Graduate Program.

The program gave me an in-depth understanding of the company and the industry - both in Denmark and abroad. By being deeply involved in international projects from the beginning I have gained valuable insights which I apply today to manage my own international projects." At GEA, you get to work with passionate and competent people who are experts in their field, and the willingness to learn and develop is rewarded with valuable support and guidance."

- *Project Manager, Magnus Jochumsen.*
