

Do you want to create a brighter water and energy future?

Kamstrup is world leading manufacturer of system solutions for smart energy and water metering. Through our leadership, expertise and passion for partnership, we always think forward in pursuit of a brighter energy future; one that advances the performance of every customer, whilst creating lasting value for the communities they serve.

We take responsibility for the way we act and we are committed to reduce waste with the purpose of securing clean water and energy to a maximum number of people.

ABOUT KAMSTRUP

Kamstrup develops, produces and sells smart metering solutions for energy and water, from intelligent meters and remote reading systems to analytics and services. The customers are utilities, property managers and other companies who depend on reliable consumption data.

A chance to walk down new paths

ADVERTISEMENT

Emil Munksø Jørgensen's story is a textbook example of how Kamstrup hires newly graduated engineers. He went from being an intern to student worker to full-time employee.

The six-month internship was part of Emil's studies in Information and Communication Technology. After two months in a software development team in Kamstrup's electricity department, he was headhunted for the newly established Team Kaizen, which is Japanese for continuous improvement. »It is a DevOps team – short for development and operations – that works to improve the software development process. We had to implement more automatic processes and establish a new way of working in order to enhance the quality of the software that our developers deliver to our customers,« he explains.

TRUSTED WITH BIG RESPONSIBILITY

Emil felt very welcome at Kamstrup where he was appointed a mentor who showed him the ropes. When the internship ended, he decided to stay on as a Student Programmer to develop personally and professionally.

And so he did; a few months before Emil graduated, Team Kaizen's Team Lead quit, and Emil was offered the position. In January 2019, he was hired as a full-time employee and officially became Lead Developer and Team Lead.

»It was a bit scary to take on such a big responsibility, and I had a lot to learn about management. But I am glad that I got the chance to try my strength against it. It was very big of Kamstrup to give me that title and responsibility. It shows that they trust you,« the 24-year-old Bachelor of Engineering says.

YOU CAN ALWAYS TURN IN A DIFFERENT DIRECTION

After seven months, Emil passed on the Team Lead baton to focus on software development and architecture. »I realized that I am more passionate about technology and creating the best software solutions,« he says and concludes: »I am glad that Kamstrup has allowed me to try out different things and figure out what I want to do. They are very good at opening new doors for you. And if you have gone down a path that turns out to be wrong, you can always take a step back and turn in a different direction.«
