

Vestergaard Company is a family owned production company headquartered in Roskilde, Denmark. In addition to Denmark, Vestergaard Company also has offices / production facilities in North America, Thailand and France. In response to market demands, Vestergaard Company has grown significantly in recent years and now employs approx. 300 people worldwide to support customer needs.

The company's production covers more than 13,800 m2 for manufacturing the Elephant® family of aircraft deicers, toilet service and water units, as well as aircraft washers. More than 1,700 deicers and 500 toilet / water service units have been produced in Denmark in the last 50 years. The company thus has a great deal of experience in the development and manufacturing of high quality ground service airport equipment created to fit the needs of customers in a dynamic industry.

At Vestergaard Company, the entire process is handled from idea and experiment, to development, testing and production to service and maintenance. As an employee in one of the company's many different roles, you have the opportunity to contribute and influence the development in a growth company, where quality and functionality of the products are the focus, and maturation of business- and production processes often comes into play. This applies to one's own area, but also to a high degree in interaction with all the company's other stakeholders in working days with a hands-on approach and with a short path from idea to action.

**“It is very exciting and motivating to work with high-tech components in a company at the forefront of development with market-leading products”**

*Casper Vitthøfft Andersen, former Technology Engineering student”, now employed with Vestergaard Company as Application- and Development engineer*
